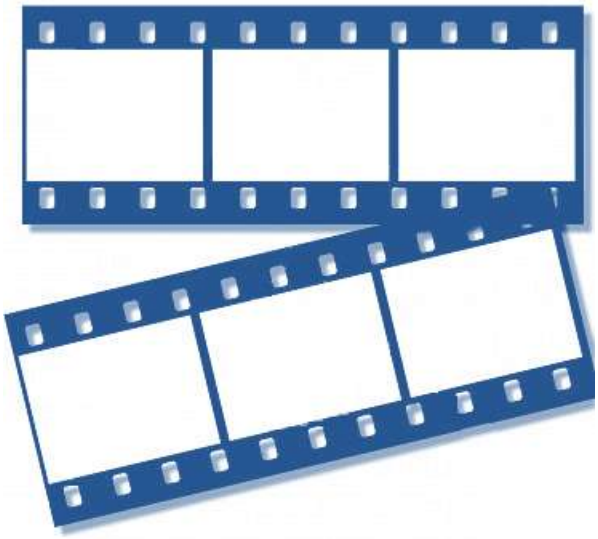
Film

The main feature of the USA Football Game Film application is to easily view and share video with your coaches, players and parents. Coaches or videographers can quickly upload gigabytes of video and share the film privately and easily with other members of the team as well as comment on the film or exchange the film with other teams.

Coaches will see an increase in productivity by coaching and communicating when they are off the practice field. Players will spend more time learning and preparing outside of practice by watching film and reviewing comments and instruction!



The USA Football Game Film application accepts virtually any video file format. We process the video and stream it across the Internet as a WMV or MP4 file based on your device. Users can access the film on your team using a Windows or Mac computer as well as on Apple iPad, Android based tablets and mobile devices such as iPhone, Android, Windows Smart Phone or Blackberry device.

Users can also download the film to their device if the Coach allows it. This may be useful in situations where the user has a slower connection or wants to create their own highlight videos. It is also useful for coaches who want to back-up their film or burn to DVD.

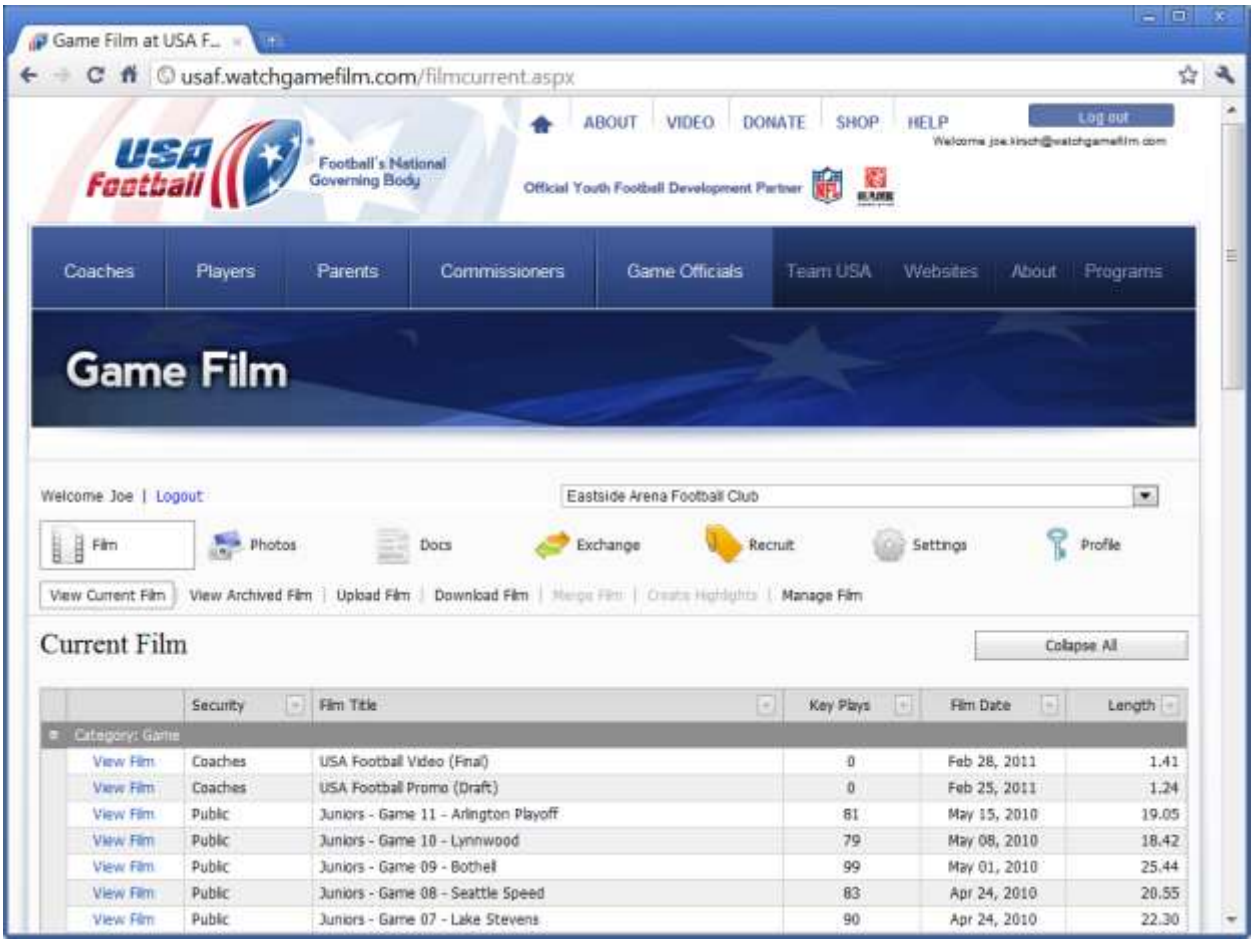
When a film is uploaded to your team, notification is sent to the users telling them that the film is ready for viewing. Depending on the user's Profile settings, they can even receive these notifications on their mobile device through text messaging if they so desire.

The USA Football Game Film application helps you to build the film library you always wanted by allowing you to store and stream literally hundreds of full length games, scrimmages, training videos and more.

Film: View Current Film

To view film in your team site go to the Film tab and click on View Current Film.

To view film, simply click on the View Film link next to the film name. This will open the video player and the film will start playing automatically.



You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Film: View Archived Film

Film Archive is an additional storage section that will move any film out of your regular list of current films so that your players and coaches do not have to muddle through a large list of film to find what they are looking for. To view Archived film in your team site go to the Film tab and click on View Archived Film.

To view Archived film, simply click on the View Film link next to the film name. This will open the video player and the film will start playing automatically.

	Security	Film Title	Key Plays	Film Date	Length

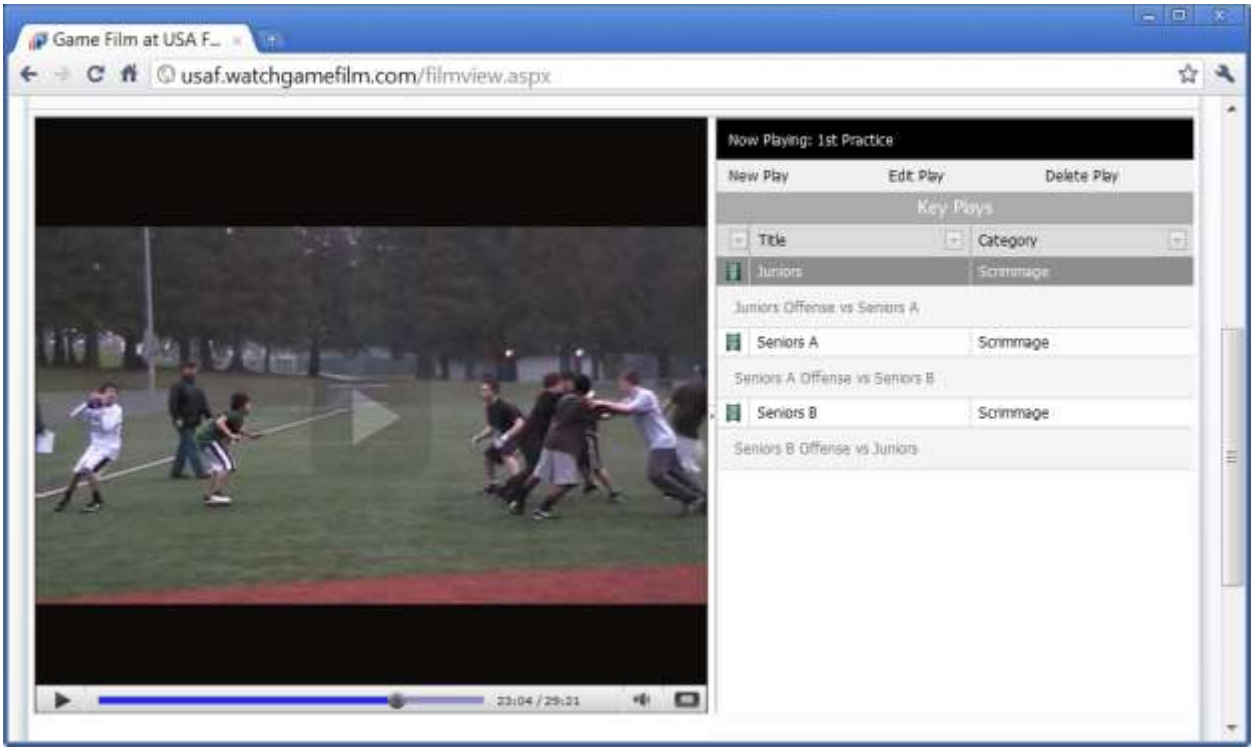
You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

You may want to Archive old film that you're not ready to delete but don't need in your film list. To Archive film, click on Manage Film, Edit the film in question, change the storage to Archive and click on Update. You can see your Archived Film by clicking on View Archived Film.

Film: Watching a Video

Once you click on the View Film link next to the film name a new page displays that will open the video player and automatically start playing your video. Please note that you can expand the video if you don't need to work on or review Key Plays by clicking on the small arrow in the middle of the right hand margin of the video player.



Playing Video on your Computer, Tablet or Mobile Device

For Windows desktops, the USA Football Game Film application uses the Windows Media Player plug-in for all team members who are using Microsoft Internet Explorer as their web browser. This player includes Full Screen and Volume controls as well as Slow Motion and Instant Replay. The Windows Media Player plug-in is part of the Windows operating system and is standard on all IE web browsers. We recommend that you use this web browser if it is available to you.

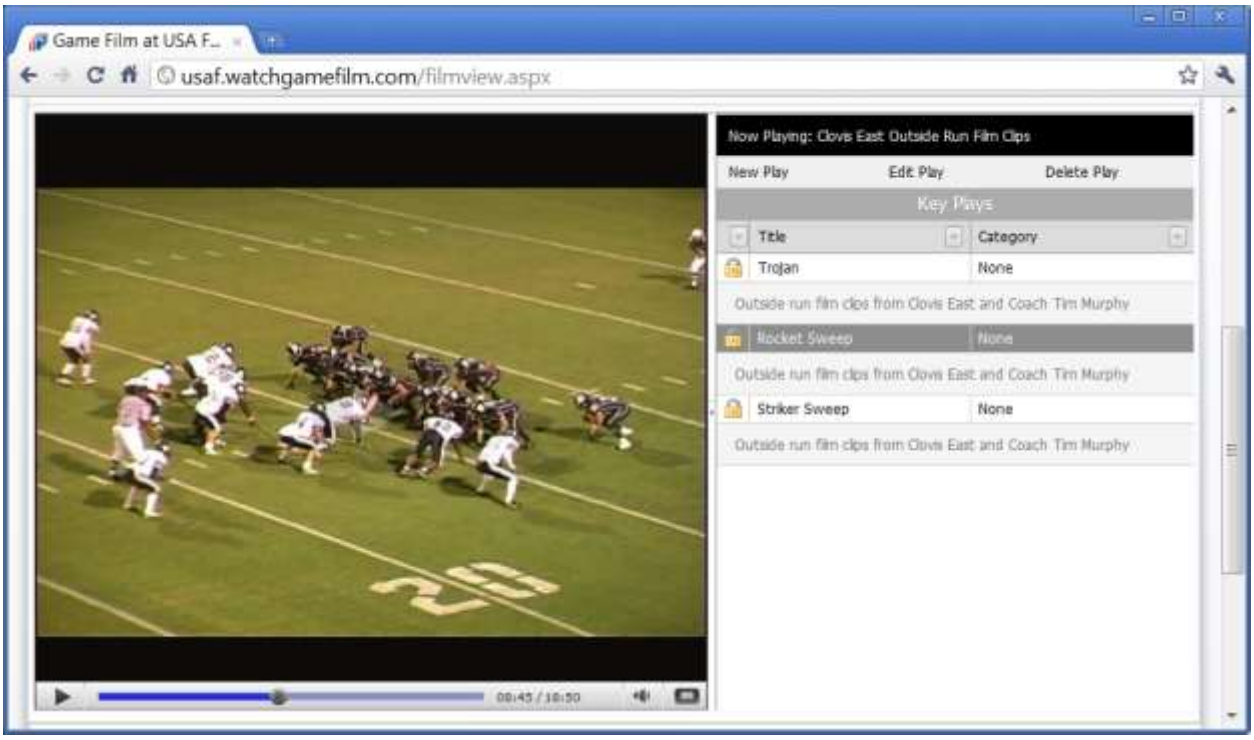
For all Mac desktops or any Windows desktops using Firefox, Google Chrome or other non-IE browser, we use Microsoft Silverlight as our video player. Silverlight is a web plugin that allows users to view video over the Internet similar to how Adobe Flash plays video. You may need to install Silverlight before you can begin watching film. If so, you will see an Install Silverlight icon instead of the video when you click on the View Film link.

Tablets such as Apple iPad as well as Mobile Devices such as Android and iPhone will view a MP4 version of our film directly on their device. iPad users may use our main application; however, we have a separate application for Mobile Devices. Please see Viewing Film on Mobile Devices for more details.

Film: Key Plays

Using Key Plays, coaches can make comments on any part of the video allowing easy and effective communication with players and your coaching staff. You can use the Key Play feature to break-down film, teach players during non-practice hours, prepare for an upcoming opponent, create highlight films as well as point out important parts of game film to Recruiters.

The main Film List shows if a film contains any Key Plays. To view the Key Plays, click on the View Film link in the Film List next to the Film Name. The film player will automatically show and the list of Key Plays will be to the right of it. Simply click on a Key Play and the player will jump to that point of the video and begin playing.



Your Key Plays will be shown in chronological order, but remember users can filter on either Category or Title to list Key Plays according to the Category or Title you created. Users can click on a Key Play again to repeat the Key Play. Key Plays don't need to be viewed in chronological order; a user can click on any Key Play and the film will go directly to that particular Key Play.

Adding a Key Play

To create a Key Play, simply click on New Play at the point in the video where you want to break-down and/or comment on the film. Most coaches who are breaking down film will go back and forth over a particular play before making a comment on the play. They may also view the play in Slow Motion to further analyze the play.

When you are ready to make a Key Play, click on the video player's Play button to pause the video and then click on New Play. Once you have clicked on New Play, enter the following information:

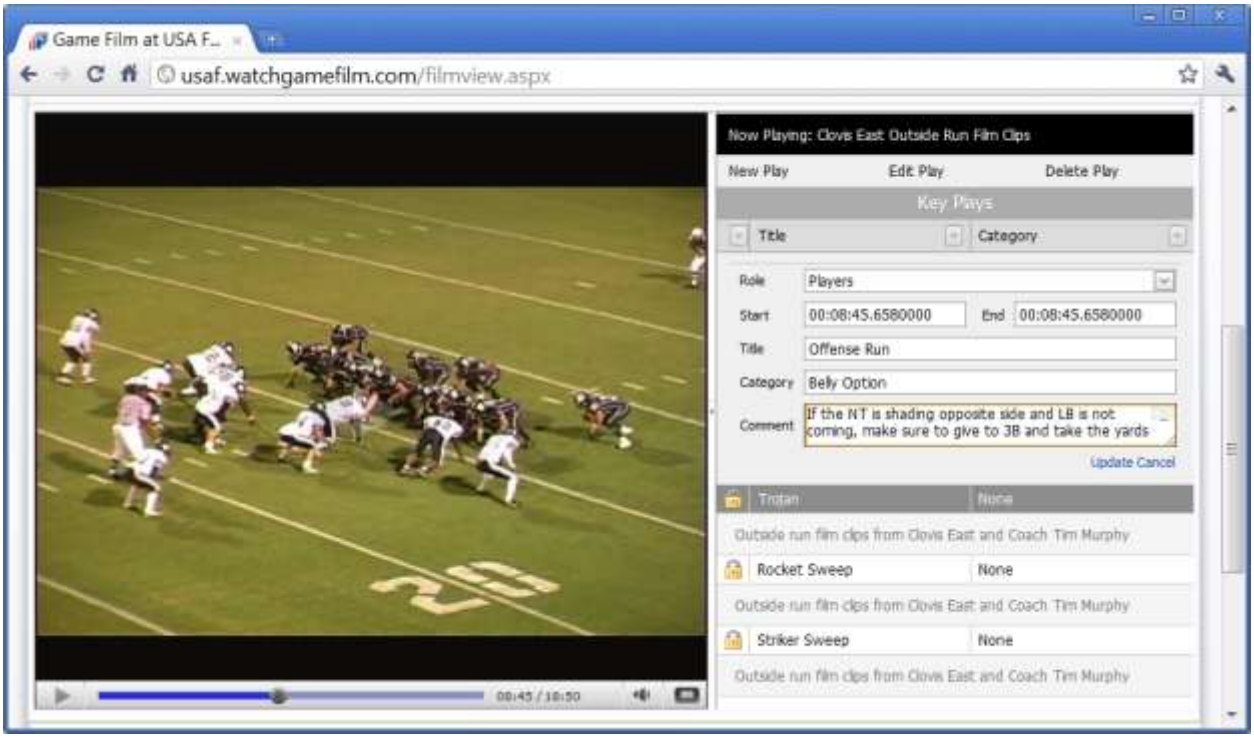
Role: Is this comment for Coaches or Players? Players will only see comments marked Players. Coaches see all comments.

Start Time: The start time is set automatically when you click on New Play based upon where the video is playing at that point. It is easiest to pause the video at the point where you want to breakdown/comment and then click on New Play.

End Time: The end time is currently set to the same point as the start time. You do not necessarily need to enter an end time, as that capability is designed for a future release called Create Highlights that will allow you to actually cut up your film.

Title, Category and Comment: This is where you can personalize the Key Play feature to outline as much or as little information as you want. Keep in mind that you will be able to filter on either the Title or Category in the main list of all your Key Plays.

When you are done entering your information, click on Update to save your Key Play.



Many coaches are using the Key Play feature to breakdown all of their plays in a game and provide commentary as well. An example of this would be to use the Title to mark the type of play (ex. Offense Run, Offense Pass, Defense Run, Defense Pass and Special Teams) and the Category to name the specific play (ex. Wishbone 35 Counter). You would then enter your written commentary in the Comment section. This feature can also be used to break-down scout film of your opponents.

Additional Thoughts on Key Plays

The Key Play component becomes very effective for teams when multiple coaches start breaking down their portion of the film. Players and coaches can then filter on Key Plays to only look at the part of the film they are interested in (Offense, Defense, Special Teams, etc.). This allows them to view parts of the film within minutes instead of watching the film in its entirety

It is important to remember that creating Key Plays allows coaches to coach during non-practice hours. Kids can look at scout film and see specific things that coaches want to point out as well as look at their own game film and see teaching comments a coach has entered for them.

Key Plays do NOT show up on film you exchange with other teams. So there is no need to worry about what you say in your Key Plays when exchanging that film with another team. Key Plays also do NOT break a film up into individual segments. Users are still able to download the film in its entirety.

Unfortunately, Key Plays do NOT show up on the Apple iPad, Android Tablets or Mobile Devices. This is because we stream the film to those devices directly as a MP4 file. Our player is not a part of the process and thus we cannot attach comments to the film for those devices. We hope to offer this capability in 2012.

Highlights and Scout Film

In the near future we will be releasing our Create Highlights feature that will allow you to select various Key Plays from all of your film and create a separate video based on the Key Plays you have selected. This is a great way to create an individual highlight film as well as a scout film showing all run packages for example.

As stated earlier, Coaches will need to enter a Stop Time on each Key Play in order to be able to cut up the film and create a new Highlight video.

Film: Upload Film

To upload film to your team, we require a computer file (video). No special video recording or editing software is needed and no special camcorders are needed to work with us. A camcorder or video process that can create a file and store it on a computer is all you need. To begin uploading your film, go to the Film tab and click on Upload Film.

Complete the information on the Upload form and select the film from your computer that you want to upload. We accept virtually any video format. Remember that the film needs to be under 4 GB in size.

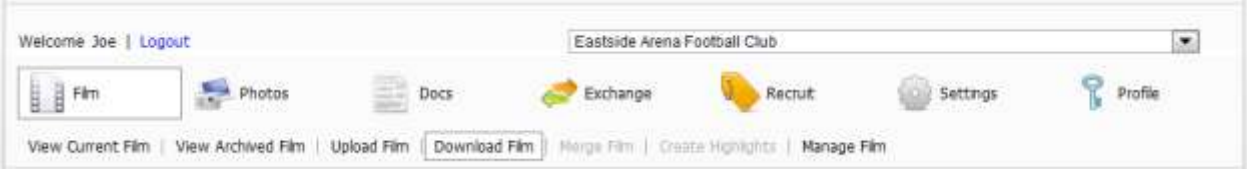
Uploading (11%)...

Once you have completed the form and selected your video file, click on Upload Video button to begin transferring the video from your computer to our server. You should see a progress bar displayed showing you the amount of time remaining in order to complete your upload. Once the upload is complete, the file will be optimized on our end and then posted to your team.

For more details and tips on Preparing and Uploading Film please see our Uploading Tips section of this Help document.

Film: Download Film

You can download film to your computer to view locally without an internet connection by going to the Film tab and clicking on Download Film.



In the film list, click on the WMV link next to the film in question. The film can then be saved to your computer. The film will be downloaded in a WMV (windows media video) file format.

You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Mac users will need to install a free QuickTime plug-in called Flip4Mac in order to properly view the WMV video. Please see our help document Viewing Film on a Mac for full details.

Film: Merge Film

This feature is currently under development and is expected to be released April 2011.

Film: Create Highlights

This feature is currently under development and is expected to be released April 2011.

Film: Manage Film

The Manage Film section of our application allows coaches to define the role and category of the film as well as the Title, Comments, etc. To modify the properties of a film or delete it, go to the Film tab and select Manage Film.

A film list is displayed showing all of your film. Coaches can change the properties of the film as well as who can view it. Coaches can also enter a new category for the film. This is a nice feature for wrestling teams that want to categorize their film clips by player or weight level. Once you have made your changes, click on the Update button to save your information. If a coach decides to delete a film, it is a permanent action and the film cannot be recovered.

Film: Frequently Asked Questions

Q. How do I view film in my team?

A. The default setting of our system is set to View Current Film. To view film, simply click on the View Film link next to the film name. This will open the video player. Please note that you can expand the video if you don't need to work on or review Key Plays by clicking on the small arrow in the middle of the right hand margin of the video player.

Q. I heard that some users have controls for Full Screen, Slow Motion, Normal Speed, Fast Motion and Instant Replay. Why don't I see those controls on my video player?

Those controls are only available when using Internet Explorer as your web browser. All other browsers use Silverlight as the media player which does not currently offer those features. You can go to full screen on any video player by simply right clicking on the video and selecting Full Screen.

Q. When I try to play the film, it's constantly buffering and will not play. What is causing this and how can I fix it?

A. See the help page titled Unable to Stream Video/Buffering Problems.

Q. Can I change the way my film library lists the film?

A. Yes. You can filter your film list by Security, Film Title, Key Plays, Film Date or Film Length. Simply click on the column header to sort by that particular column or click on the drop down menu next to the column name in order to apply a filter to the list.

Q. How do I change the film settings?

A. You can easily change any film setting by clicking on Manage Film.

Q. How do I delete a film?

A. You can delete a film permanently from your film library by clicking on Delete in the Manage Film section.

Q. If I delete a film is it deleted permanently?

A. Yes. You will be given an on-screen warning to confirm any deletion of film.

Q. How do I edit the film information?

A. You can edit film settings by clicking on Edit in the Manage Film section, which will allow you to change the Film Title, Comments, Category, Security (Coaches, Players or Public), Film Date or Storage (Current or Archive). Change the settings and click on Update.

Q. Can I create my own film Categories?

A. Yes. Our system gives you the flexibility to create your own categories in addition to the preset options available upon upload (Games, Highlights, Scouting, Scrimmage, Tournament, Training and Miscellaneous). Remember, you can filter on any category in the film list.

Q. What is Film Archive?

A. Film Archive is an additional storage section that will move any film out of your regular list of current films so that your players and coaches do not have to muddle through a large list of film to find what they are looking for. You can do this with old film that you're not ready to delete and don't need in your film list. To Archive film, click on Manage Film, Edit the film in question, change the storage to Archive and click on Update. You can see your Archived Film by clicking on View Archived Film.

Q. Can I download film to my computer?

A. Yes. You can download film to your computer to view locally without an internet connection by clicking on Download Film and then clicking on WMV next to the film in question. The film can then be saved to your computer. The film will be downloaded in a WMV (windows media video) file.

Q. Can I burn a DVD from downloaded film?

A. Yes. You can burn a DVD once the film is saved to your computer. Please note; however, that your downloaded film will not be the same quality as the original film that is stored in your camcorder. If you're looking to create a high quality highlight DVD, you may want to work with the person who uploaded the film to obtain the original high-def film. Film uploaded to our site needs to be encoded for streaming over the internet so we do reduce the bitrate for that purpose.

Photos

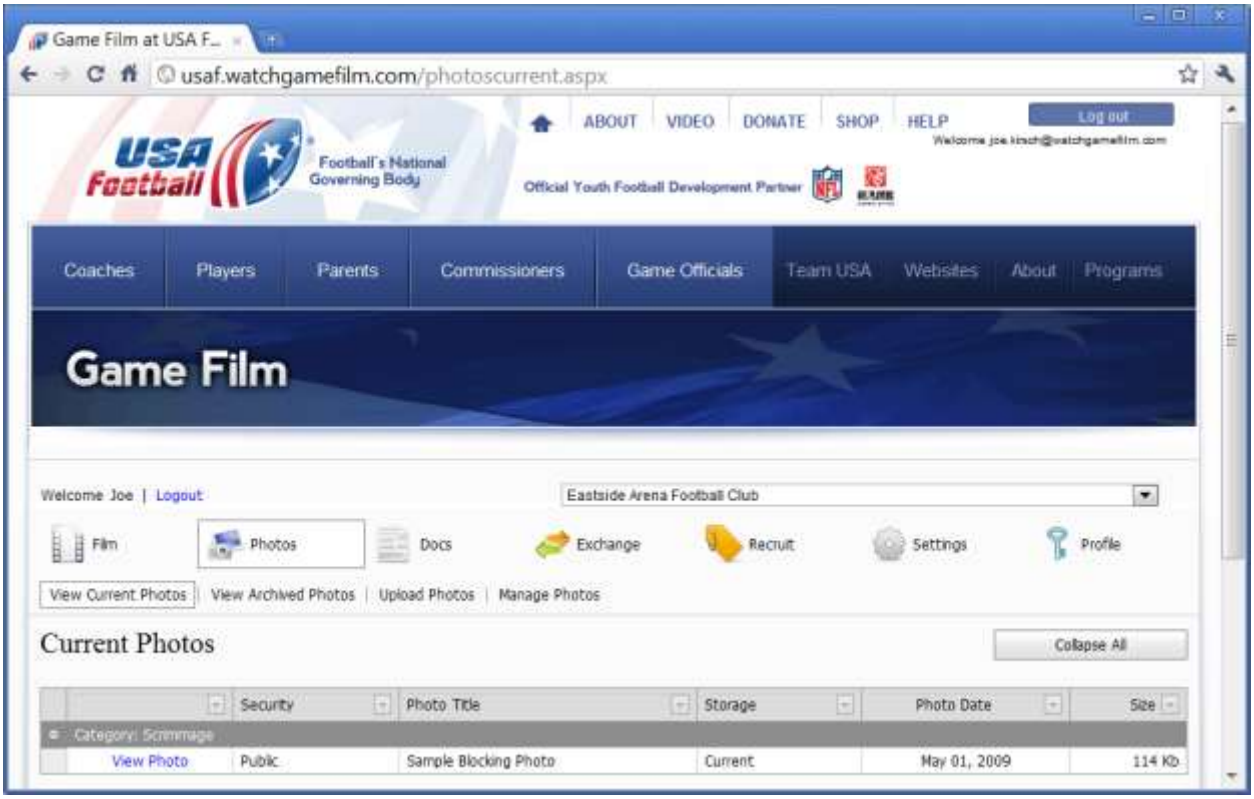
The USA Football Game Film application also allows you to upload photos to your team site. Store parent photos of past games, formation lineups, team pictures or still photo markups of scout film that will be used for game night. Coaches and players can then access these photos anytime.

Coaches can upload virtually any kind of photo. If the user has a browser plug-in that supports the photo format, the photo is automatically displayed inside the web browser. If the photo is not supported by the user's web browser, the user is able to download the photo.

Photos: View Current Photos

The view a photo, go to the Photos tab and click on View Current Photos.

The photo list will display all current photos in the team. Click on the View Photo link to view the photo.



If the user has a browser plug-in that supports the photo format, the photo is automatically displayed inside the web browser. If the photo is not supported by the user's web browser, the user is able to download the photo.

You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

A photo list is displayed showing all of your photos. Coaches can change the properties of the photos as well as who can view it. Coaches can also enter a new category for the photo. Once you have made your changes, click on the Update button to save your information. If a coach decides to delete a photo, it is a permanent action and the photo cannot be recovered.

All photo management activity is listed in the User Activity section of Team Settings.

Photos: Frequently Asked Questions

Q. How do I upload photos?

A. Go to the Photos tab and click on Upload Photos

Q. How do I edit or delete a photo?

A. Go to the Photos tab and click on Manage Photos

Q. Can I archive Photos?

A. Yes. Simply Go to the Photos tab and click on Manage Photos and change the storage to Archived. You can view all archived photos by clicking on the View Archived Photos button.

Q. Can I upload multiple photos at one time?

A. No, our system is not designed to handle the upload of multiple photos. You will have to upload them one at a time.

Q. What image formats can I upload?

A. BMP, CLP, DCX, DIB, FPX, GIF, IMG, JIF, JPG, MAC, MSP, PCT, PCX, PNG, PPM, PSP, RAW, RLE, TIF and WPG. If there is a format that you would like us to support, please contact help@watchgamefilm.com.

Documents

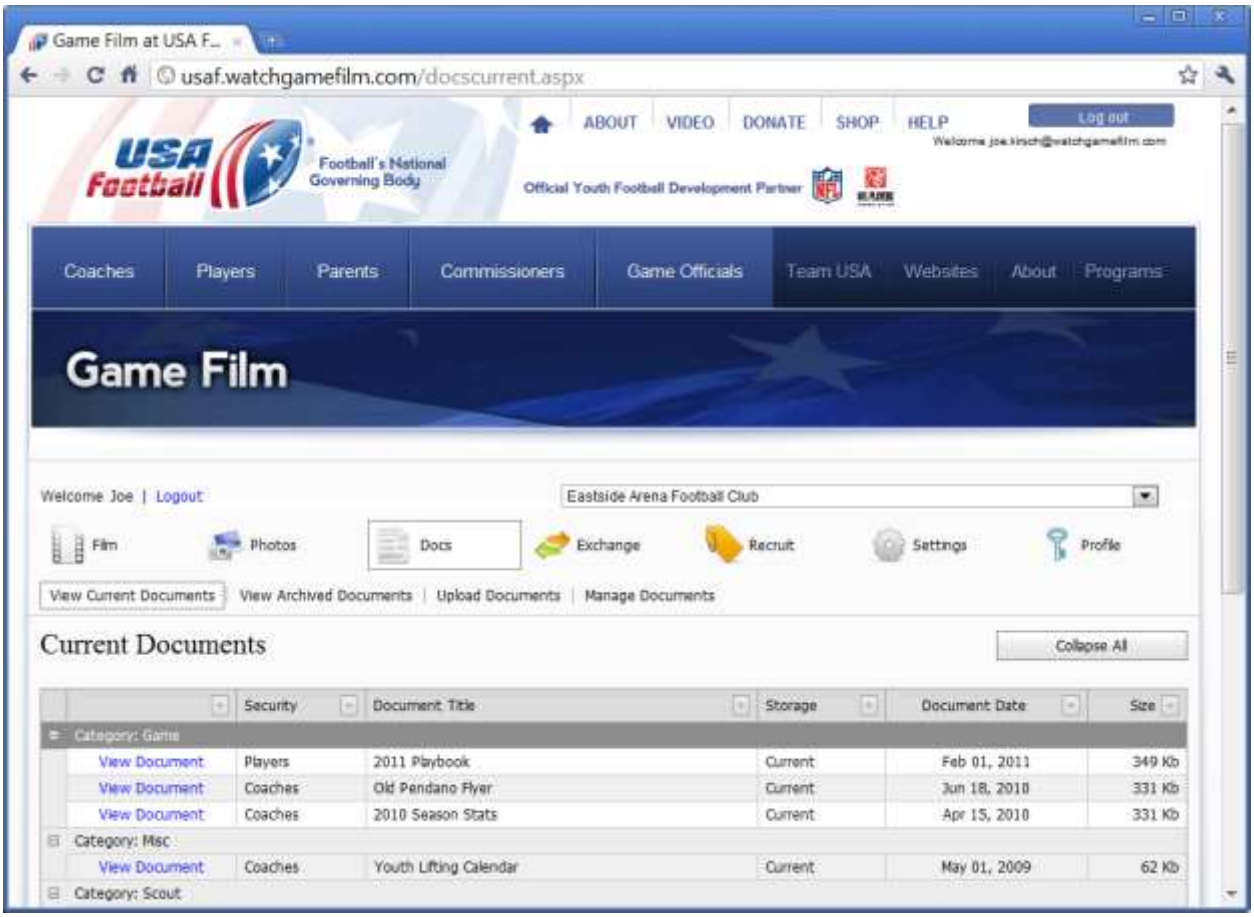
The USA Football Game Film application also allows you to upload documents to your team site. Store scouting reports, playbooks, practice plans and any other document in one single spot. Coaches and players can then access these documents anytime.

Coaches can upload virtually any kind of document. If the user has a browser plug-in that supports the document format, such as Adobe PDF, the document is automatically displayed inside the web browser. If the document is not supported by the user's web browser, the user is able to download the document.

Documents: View Current Documents

The view a document, go to the Documents tab and click on View Current Documents.

The document list will display all current documents in the team. Click on the View Document link to view the document.



If the user has a browser plug-in that supports the document format, such as Adobe PDF, the document is automatically displayed inside the web browser. If the document is not supported by the user's web browser, the user is able to download the document.

You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Documents: Frequently Asked Questions

Q. How do I upload documents?

A. Go to the Documents tab and click on Upload Documents

Q. How do I edit or delete a document?

A. Go to the Documents tab and click on Manage Documents

Q. Can I archive Documents?

A. Yes. Simply Go to the Documents tab and click on Manage Documents and change the storage to Archived. You can view all archived documents by clicking on the View Archived Documents button.

Q. Can I upload multiple documents at one time?

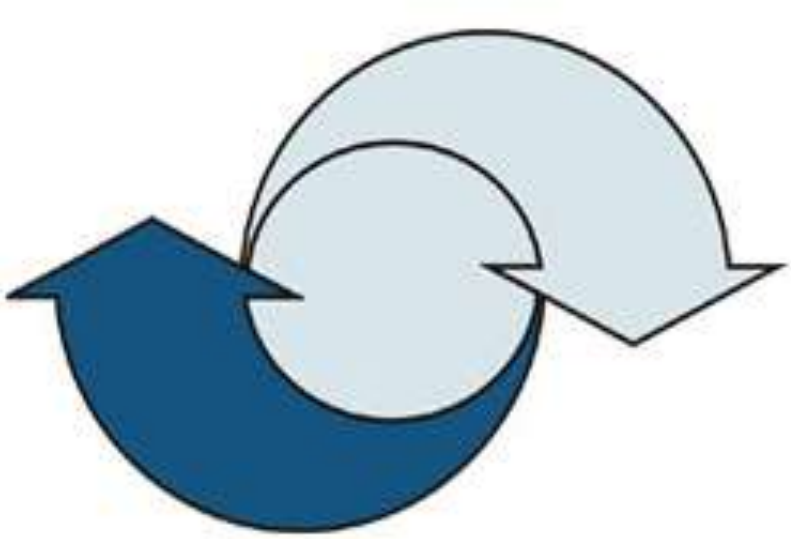
A. No, our system is not designed to handle the upload of multiple documents. You will have to upload them one at a time.

Q. What documents formats can I upload?

A. Microsoft Word, Microsoft Excel, Web HTML files, Microsoft Power Point, Microsoft Excel, Adobe PDF as well as Text, XML and ZIP files. If there is a format that you would like us to support, please contact help@watchgamefilm.com.

Film Exchange

Our Film Exchange feature offers instant, online film exchange for your conference, league or association. Whether you are part of a youth league, a high school or collegiate conference or a large adult amateur league, we can set up a film exchange system to meet your needs. Eliminate the time and expense of dealing with DVDs, couriers, shipping or travel to exchange your film with other coaches by doing it online with the USA Football Game Film application.



Completely Private and Secure

Coaches have complete control over the exchange of film. Nobody outside of your team has access to your film unless you exchange it with them. Players and Parents do NOT have the ability to exchange film. Film that you exchange and film received from other teams in your league, conference or association goes directly into the Scout Film folder of your system and is marked for Coach-only viewing.

Please note that any Key Plays you have entered on your film do NOT get transferred with the exchanged film. Your Key Plays are completely safe and secure and only a copy of the original film is exchanged.

Exchange: League Exchange

When each team in your conference, league or association has a USA Football Game Film system, we set up a private film exchange system that only these teams can access. Exchanging film within your group is easy and instant. Simply go to the Exchange tab and select League Exchange.

Select the film you want to exchange and then select the team to receive your film from a customized drop down menu containing all the teams in your conference, league or association. You can even select "All Teams in League" to send your film to everyone in your group. There is also a box to add comments for the other coach. Once you are ready, hit the Send Film button to make your trade.

After you have successfully submitted an Exchange, a copy of your film will be placed in their team site and the trade will show up in your Exchange Activity log.

Exchange: Non-League Exchange

You can exchange film with another USA Football Game Film customer outside of your league, conference or association by going to the Exchange tab and clicking on Non-League Exchange.

Select a film from the list. Once selected, it will show up below the grid. Next, enter the email address of the coach you want to exchange film with. Click on Find Person and our system will pull up all teams that the coach is associated with. Choose one of the teams, enter comments and hit Send Film.

Send Film to Selected Team

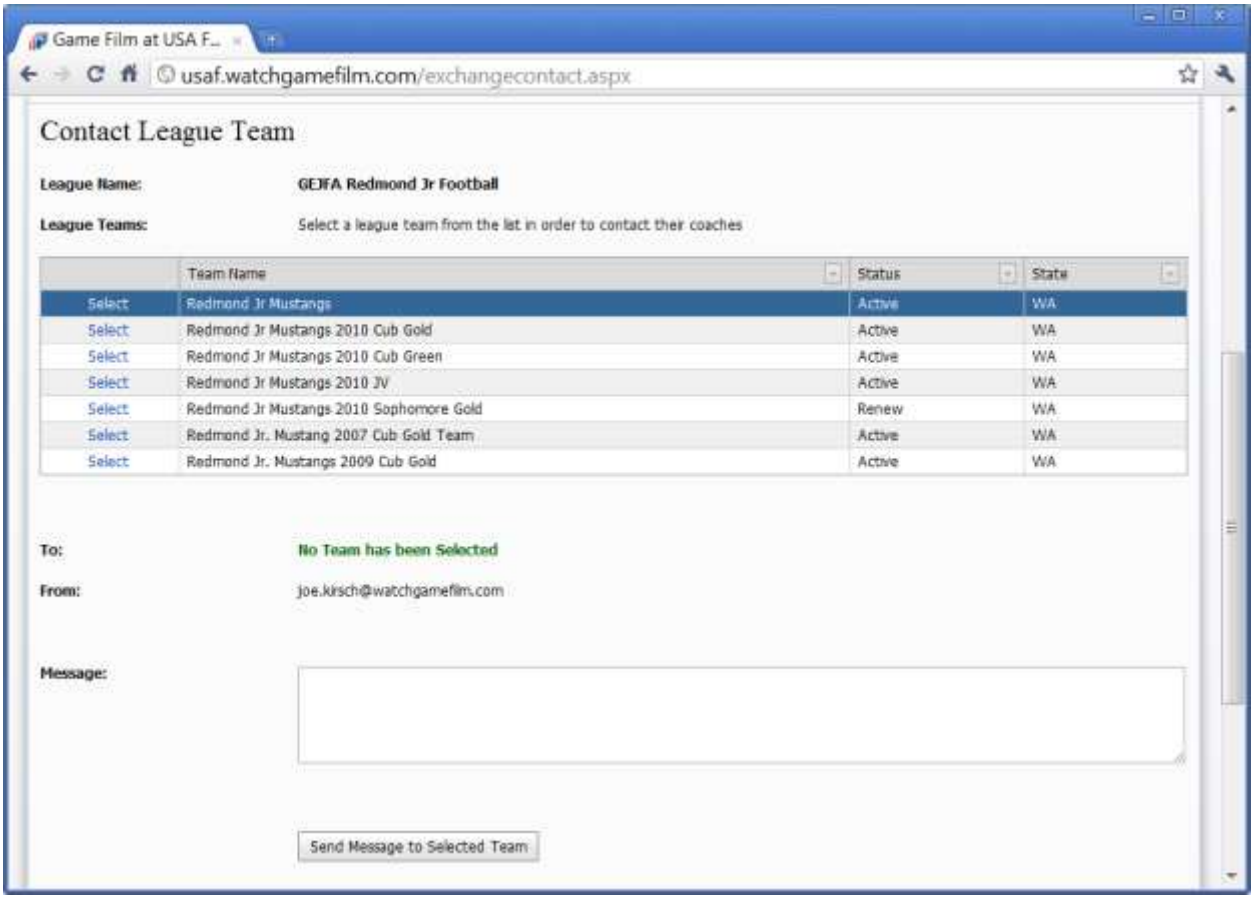
Click on the Send Film button and that person you are trying to exchange with will receive an invitation to sign up for a free 10 day trial. Once they've created a trial team, the coach will be recognized in our database and you will be able to do a successful film exchange one more time as described above.

Exchange: Contact League Team

The USA Football Game Film application includes a built-in messaging component for any of the teams in your group or league. Many times you do not have contact information on the coaches of the other team. Our messaging component is a simple and easy way to communicate with the coaches of the other team in your league in order to set up a proper trade between the two teams.

To contact another team, go to the Exchange tab and click on Contact League Team.

Once you are the contact page, select the team that you want to send a message to. Then enter your message in the box and hit Send. An email with your comments will be sent directly to the coaches of the receiving team.

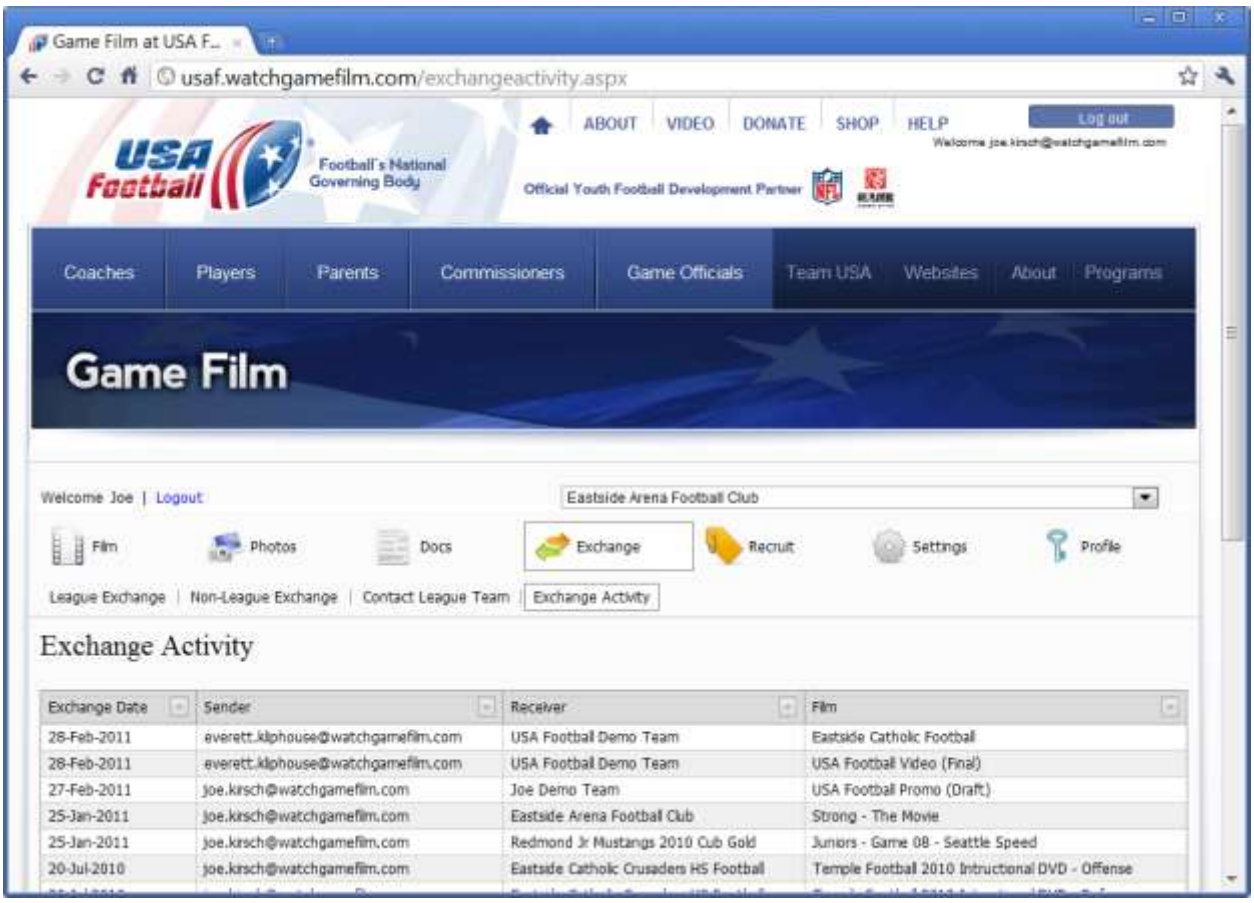


The contact page is a great way to discuss and agree on a trade, to ask teams for a specific film, etc. It is intended to be used as a pre-trade communication tool so that both teams are in agreement and able to then make a film trade.

Exchange: Exchange Activity

You can review a complete history of your exchange activity (both sent and received) by going to the Exchange tab and clicking on Exchange Activity.

A full log will then be displayed showing you all of the film that has been exchanged out of your team as well as all of the film that you have received from trades.



You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Note that film exchanges will only show up in the Exchange Activity page and will not show up in the User Activity page located in the Settings tab.

Exchange: Frequently Asked Questions

Q. Do other teams have access to my team?

A. No. When an exchange is made, a copy is made of your film and then the copy is put into their team site by our application. Coaches from the other team never have access to your team site or the film stored in it.

Q. Can I take back an exchange after I have sent the film to the other team?

A. No. Once you send film to another team a copy of that film has been placed in their film library and you cannot undo the exchange.

Q. Can anyone exchange film?

A. Only coaches of a team are allowed to trade film. The Film Exchange feature is not available to Players or Recruiters and they will not even see this component when they log in.

Q. Are the exchanges one way or do I automatically get a film in return?

A. The exchanges are a one way copy of the film. You can memorialize your exchange agreement with the other team in the Exchange Comments, but they will need to initiate an exchange in order for you to receive their film.

Q. Where is the film that I received from an Exchange?

A. All film received via Exchange is initially located in your Scout category and marked as Coaches Only. Once you receive a film, it is yours to change as you wish.

Q. How do I set up film exchange for my league or conference?

A. In order to set up film exchange for your league or conference, each team needs to have a subscription to the USA Football Game Film application. We then create a league/conference exchange system as outlined above where you will see a drop down menu of all the teams in your league/conference.

Q. Why can't I see all the teams in my league or conference in the Exchange menu of available teams?

A. Only active and trial teams that have been added to your league or conference will appear in the drop down menu of available teams. It's possible that the team you are looking for does not have an active or trial subscription to our service. It's also possible that the team has not yet been added to the Exchange group. If this is the case, please let us know by emailing usafootball@watchgamefilm.com.

Q. Can I exchange film when it shows "pending" in my system?

A. Yes. Please note that your film is still not encoded and posted to your team so there will be a delay in the exchange. Also remember that if the film is unable to be properly encoded, it may not end up being exchanged. It is usually best to wait until the film is posted to your team first so that you have a chance to view it before exchanging it with another team.

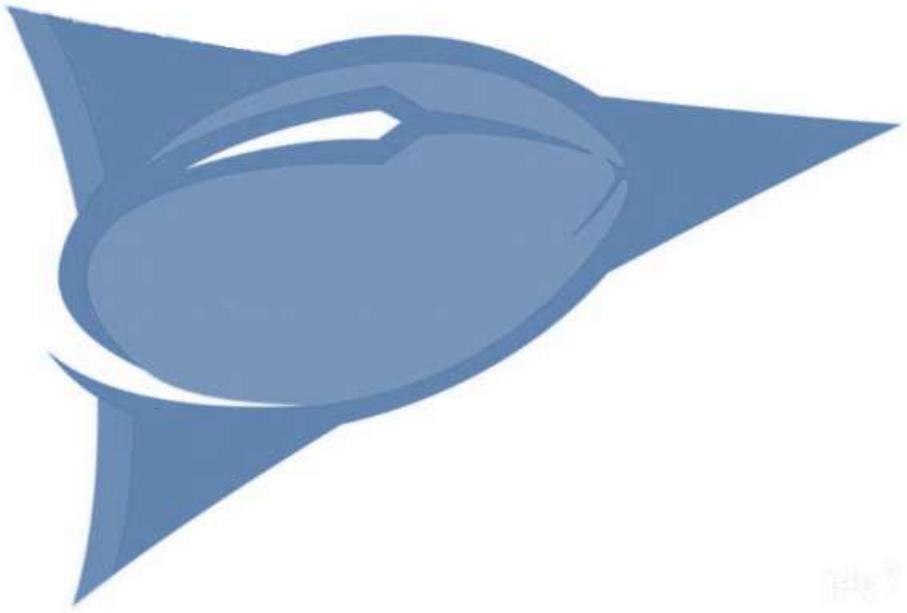
Q. Can I exchange with someone who is not part of the USA Football Game Film system?

A. Yes. When you make the exchange using the Non-League Exchange page, if the user does not exist in the database, an invite email will be sent to them asking them to sign up for a free 10 day trial. Once they create the team, you will then be able to initiate your exchange one more time and your film will be successfully sent to them.

Recruiting

Often high school and junior college coaches are asked by recruiters and four year college coaches to provide additional game film of specific players. Burning and mailing these DVDs can become a tedious and time consuming process for the coach. Additionally, players do not want to see delays in how quickly a recruiter can view their film.

Our recruiting component is designed to lighten the workload of the head coach. Unlike most recruiting services, it is not designed to promote or market players for collegiate sports. Our service is designed as a simple way to provide film access to a recruiter who contacts you requesting film of one of your players.



Youth teams can also utilize the Recruiting feature to make a film available to a coach or person outside of your team. This allows you to give access to the outside person for only that film without opening up access to all of your films by adding him to your team as a Coach or Player.

How do I add Recruiters to my Team?

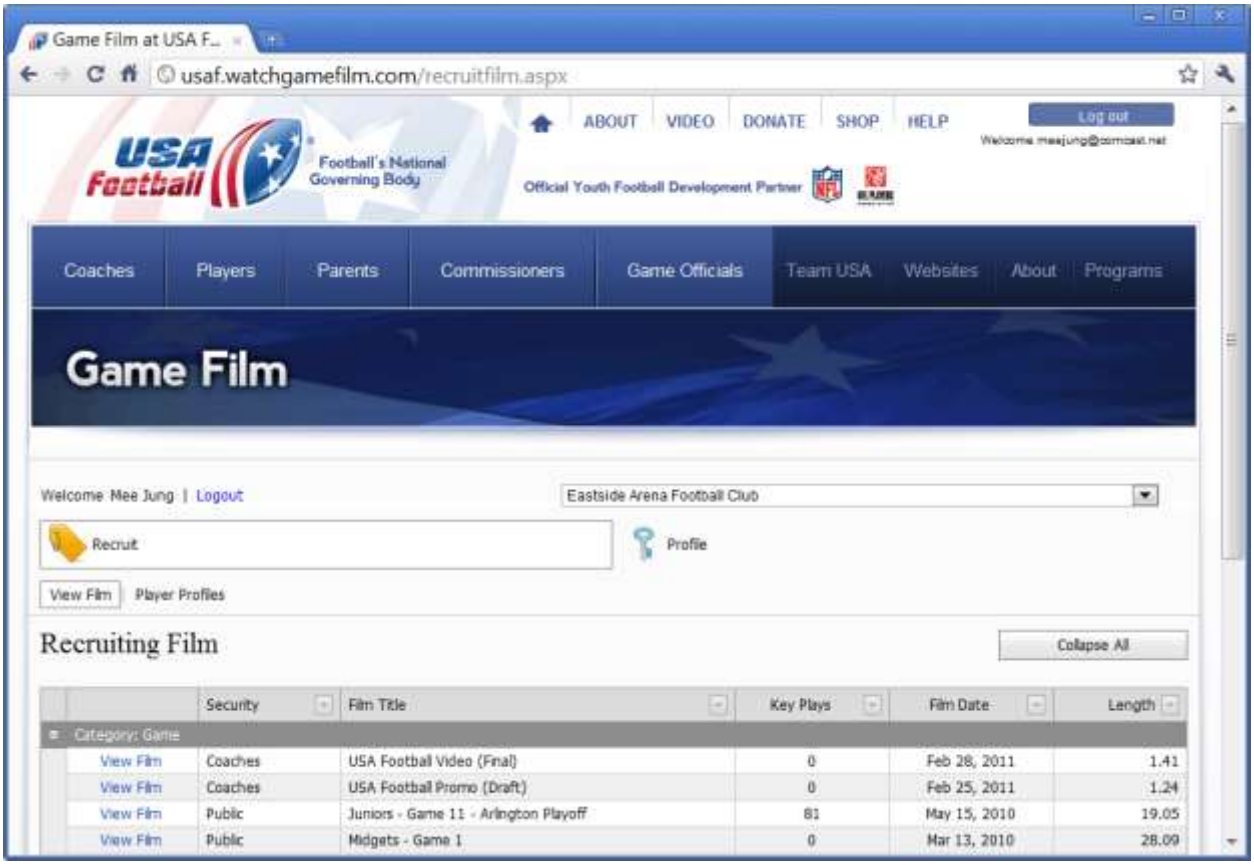
To add a recruiter to your team, go to Team Settings of the application and click on Manage Users. Add the Recruiters email address as a member of your team and define his role as Recruiter. The recruiter will then receive an email invitation and will be able to log into your team and view film that you make available.

As a coach, you are able to specify which films are accessible via the Recruiting feature. This assures you that the recruiter will only see films that you want them to see, while keeping other films in your team safe and secure.

Recruit: View Film

When a Recruiter logs in, they will be immediately directed to the View Film section of the Recruit tab.

Once the Recruiter logs into your team they will see a list of films to view. Like the View Current Film list, the Recruiter simply clicks on the View Film link to begin watching the film. Comments will show up for the Recruiter as well allowing them to quickly jump to parts of the film.



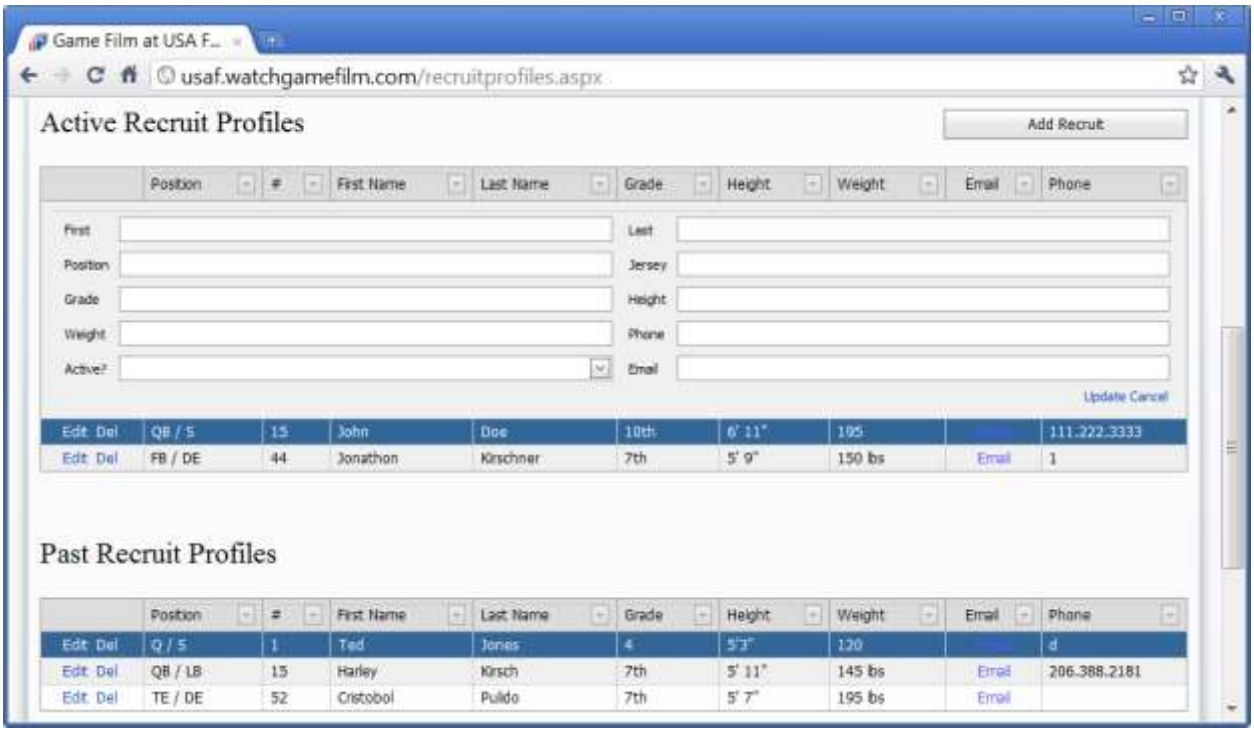
You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Notice in the image above that when a Recruiter logs in, he or she can only access the film made available to Recruiters as well as the Player Profiles. They are not allowed to see any other part of your team.

Recruit: Player Profiles

The Player Profile allows a coach or player to enter general information about the Recruit such as Position, Jersey Number, First and Last Name, Grade, Height, Weight, Email and Phone Number. To view Player Profiles, go to the Recruiting tab and click on Player Profiles.

Coaches or Players can enter in a profile. This information is then visible to the Recruiter and the Recruiter has a way of directly contacting the Player. Unlike our previous release, the current version of our application does not link film to player profiles. Thus, you can now make film available to Recruiters without having to create a player profile.



A great way to make a full length game film more user friendly to a Recruiter is to add Key Plays in the film. This will allow the Recruiter to quickly jump to parts of the film that you want to make sure they will see.

If a Recruiter does log in and view a film, his activity will show up in the User Activity log in the Team Settings tab.

Recruit: Manage Recruiting Film

To make a film available for Recruiters, go to the Recruiting tab and select Manage Recruiting Film.

You will see a list of films that are currently allowed for Recruiters to view and then below that is a list of all of your remaining film. To make a film available to the Recruiter, go to the Film Library list and simply click on the Allow link to add it to the Recruiter list. The film will then appear in the top list as well as on the View Recruiting Film page. Likewise, to review a film from a Recruiter's eyes, simply click on the Remove link and the film will be removed from the Recruiter list and added back to your Film Library.

Allow | Public | Not Allowed | Juniors - Game 05 - Lynnwood | 96 | Current | Apr 10, 2010 | 21.43
Allow | Public | Not Allowed | Juniors - Game 03 - Lake Stevens | 84 | Current | Mar 27, 2010 | 20.56

You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Note that Recruiters are able to view films that are marked as Coaches-Only or Players and Coaches. The security role of the film does not matter to a Recruiter. The only way that the Recruiter can see any film in your team is if you have added it to the Film Available to Recruiters list in the Manage Film section.

Recruit: Frequently Asked Question

Q. How do I make film available for recruiter viewing?

A. To make film available for recruiter viewing, click on Recruit and then click on Manage Recruiting Film. You will see a complete list of your film library. Simply click on Allow next to any film you want to make available for recruiter viewing.

Q. How do I remove a film that I've made available for recruiter viewing?

A. To remove a film from recruiter viewing, click on Recruit and then click on Manage Recruiting Film. You will see a complete list of all Film Available to Recruiters as well as your Film Library list. Simply click on Remove to remove a film from the Recruiter's eyes.

Q. What is the Player Profile?

A. The Player Profile allows a coach or player to enter general information about the recruit such as Position, #, First and Last Name, Grade, Height, Weight, Email and Phone Number. This information is then visible to the recruiter and allows the Recruiter with a way of contacting the player.

Q. How do I create a Player Profile?

A. To create a Player Profile, click on the Recruit tab and go to the Player Profile section. Then click the Add Recruit button and enter the information fields and click on Update.

Q. Can I use the Recruit feature to allow another coach to access a film?

A. Yes. As a coach, you may want to give another coach access to one particular film without giving them access to your complete film library. This can easily be done with the Recruit feature by simply adding the other coach as a Recruiter and then making the film in question available for recruiter viewing.

Q. If I have Key Plays on a film and make the film available to a recruiter, will they see the Key Plays?

A. Yes. Recruiters are able to see all Key Plays (Coaches Only and Coaches and Players) on the film you make available for recruiter viewing. Please note that although Players can edit their Player Profile, they cannot see film or Key Plays that have been marked for viewing by Coaches Only.

Q. How do I remove a recruiter from my list of approved users?

A. You can remove a recruiter the same as you would remove any user from your team. Click on the Settings tab, go to Manage Users and select Remove.

Q. Will I be able to tell if a recruiter looked at the film I made available?

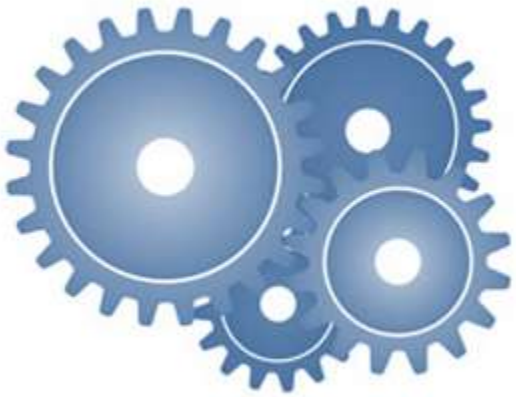
A. Yes. Recruiter activity is shown on the User Activity Log available under the Team Settings tab.

Team Settings

The Team Settings tab contains all of your account information as well as a list of users who are part of your team.

Only coaches are able to access the Team Settings. This is where a coach or owner will make a payment or activate their subscription.

It is also where coaches will add or remove users from their team as well as review the User Activity log. The User Activity log is a useful report that shows which users are viewing film, adding users and making team modifications, etc.

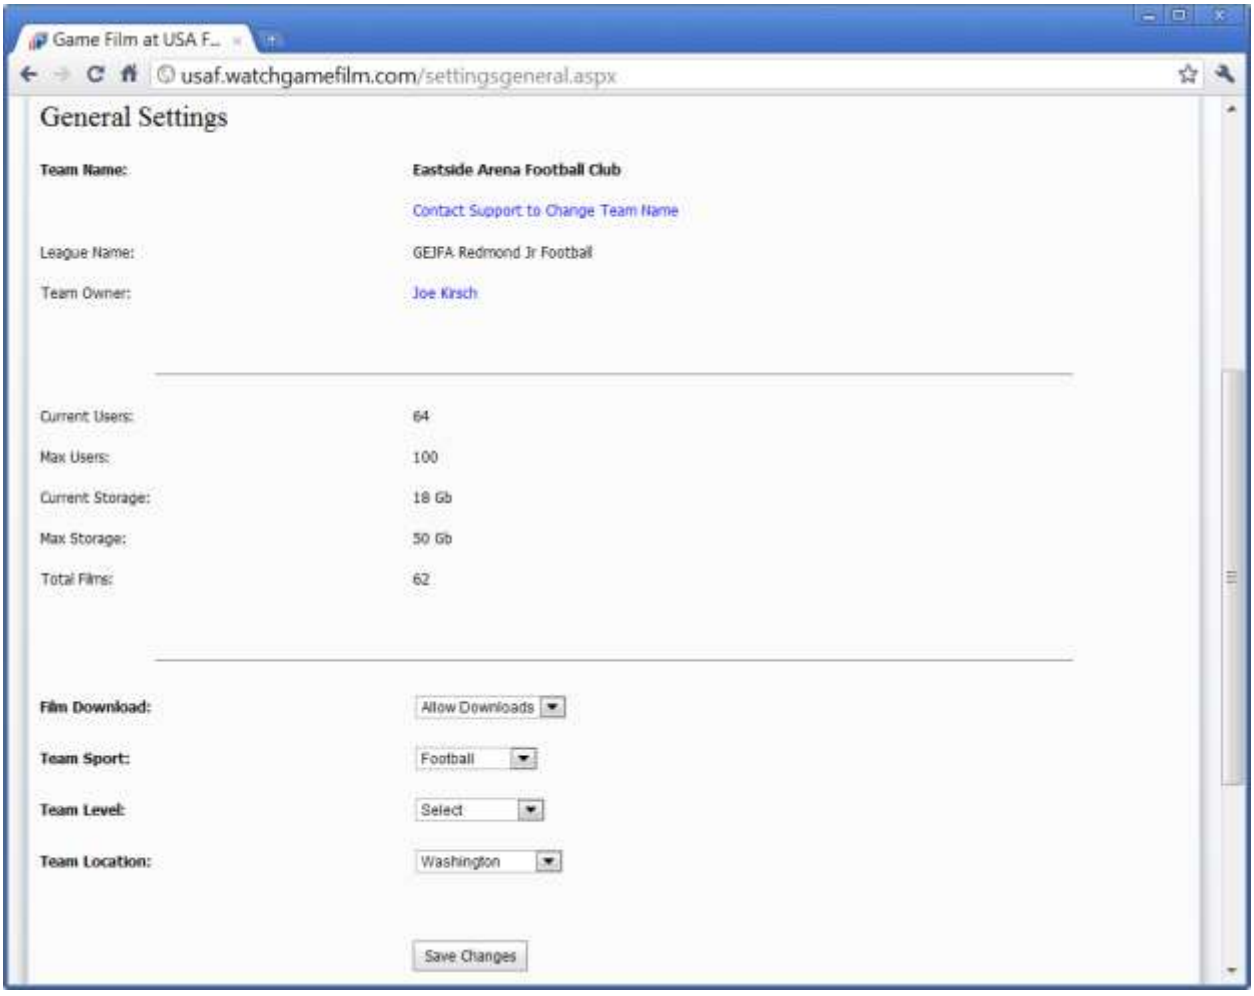


Please contact us at usafootball@watchgamefilm.com if you feel that your team is not configured correctly or if you would like to make changes to your team name, etc.

Settings: General Settings

To view your team settings, go to the Settings tab and then click on General Settings.

The General Settings section gives the team owner broad view of their team account. It shows the team name as well as if the team is configured as part of a league. It will also show how many users belong to the team and how much storage has been used.



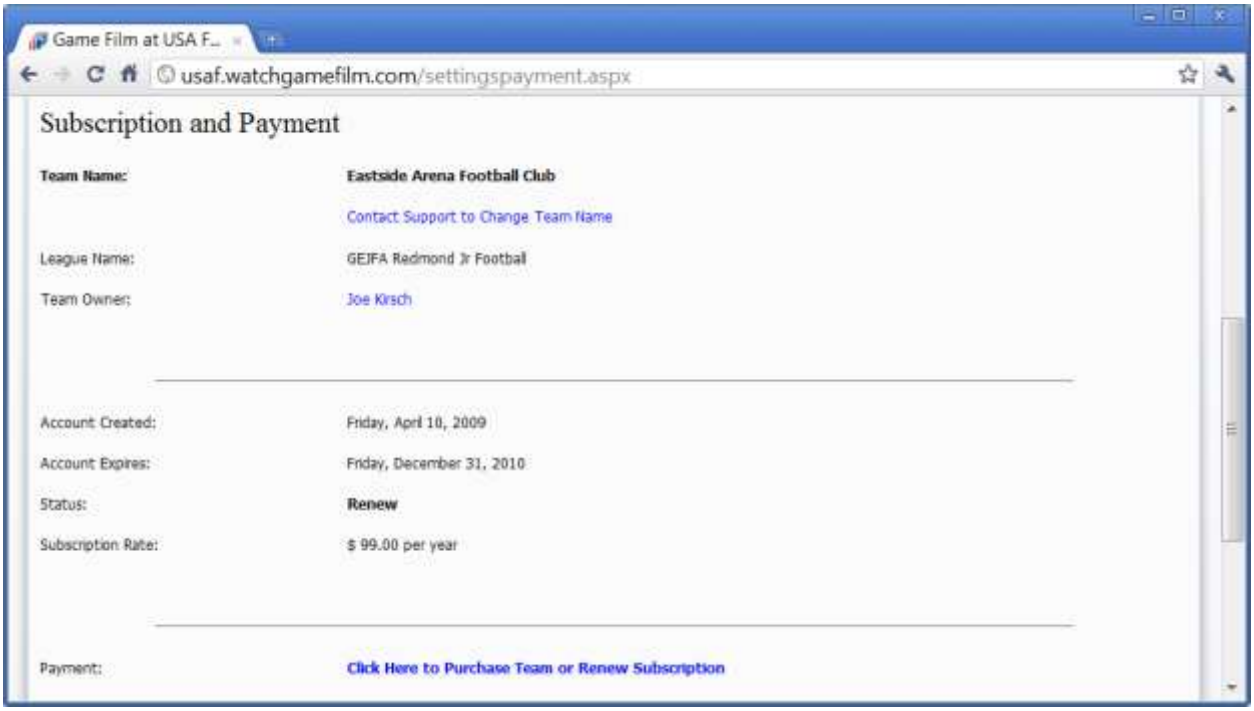
Coaches can also define the sport, level and location of the team. This information shows up if the team has public film and is listed in WatchGameFilm.TV.

The most important setting on this page is the Film Download setting. It allows coaches to define if they want users of the team to have the ability to download film from the team site.

Settings: Subscription and Payment

To find out how many days are left for your game film subscription or to make a payment and activate your subscription, please go to the Settings tab and click on the Subscription and Payment button.

A status of your account subscription will then be displayed. It will show you if your team is listed as a Trial or if it Active but needs to be renewed.



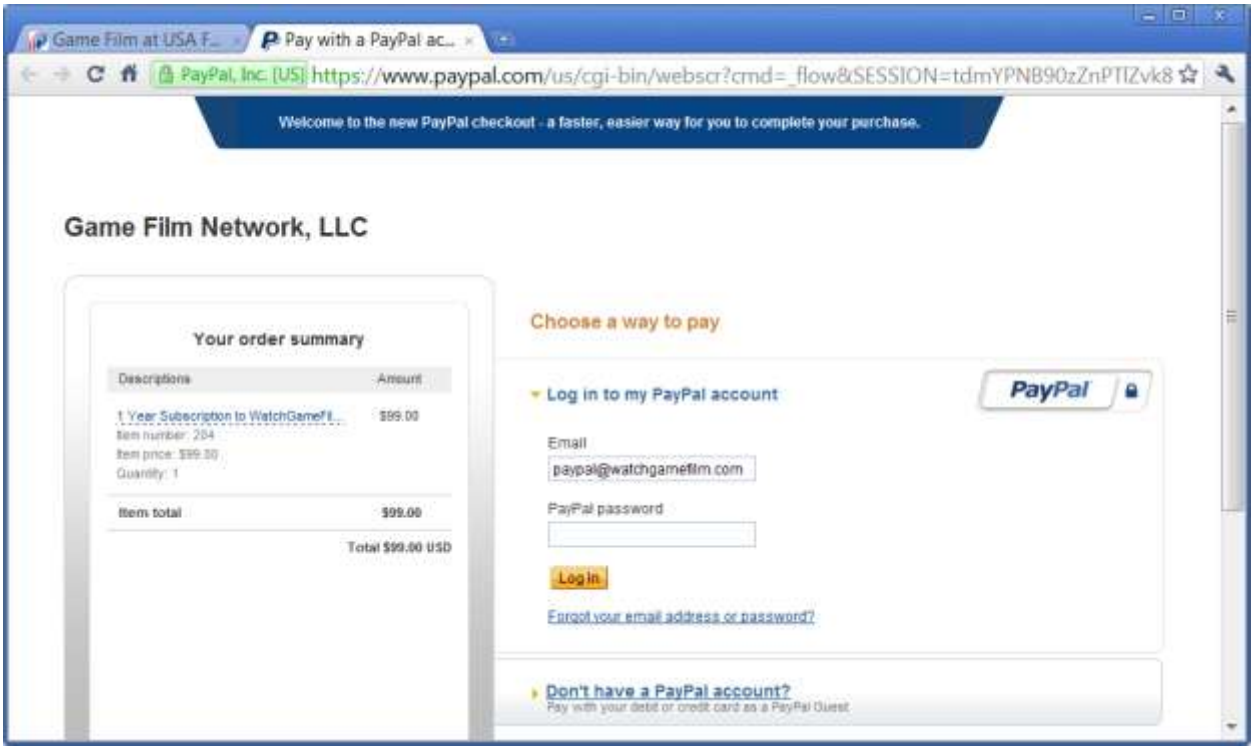
Expired Teams

Note that if your team is set as Expired, you will be directly routed to the Subscription and Payment page and will need to make a purchase in order to begin using your team again.

Making a Payment

If you would like to activate your Trial or Renew your Subscription, you may make payment directly from the Subscription and Payment page by clicking on the Click Here to Purchase Team or Renew Subscription link.

Once you have click on the Click Here to Purchase Team or Renew Subscription link, you will then be redirected to PayPal's payment site. You can then make a payment online by using your credit card.



You do NOT have to log into PayPal or create a PayPal account in order to make a payment. Simply click on the Don't have a PayPal account link below the Log In button. From there you can complete your credit card information and submit your payment.

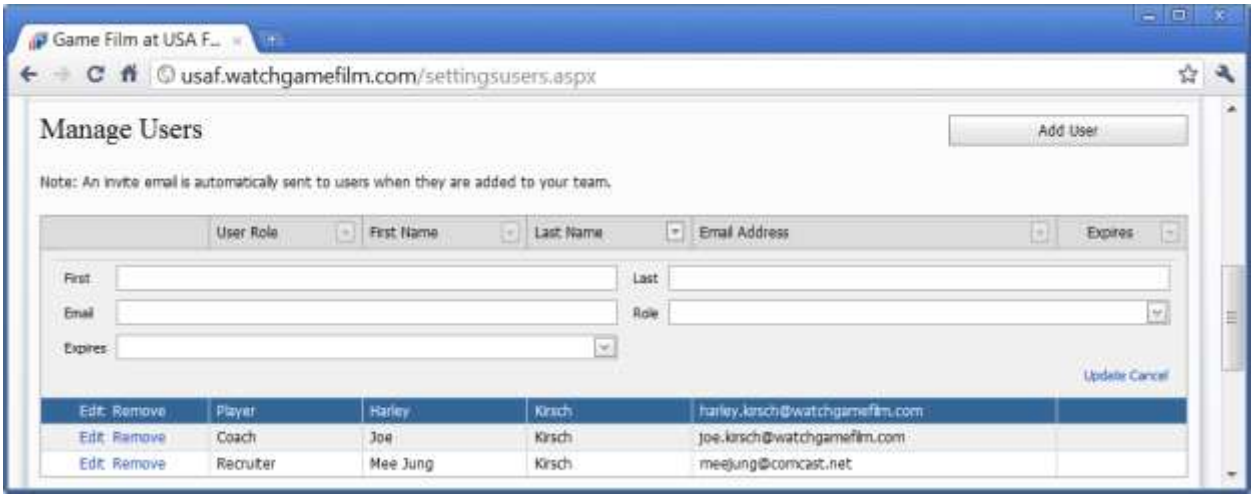
After payment, you will receive an email from PayPal confirming your payment. Your team will then be manually activated a short time later by our sales team and a second email will be sent to you letting you know that you team has been activated.

Settings: Managing Users

To add, edit or remove a user from your team, go to the Settings tab and click on Manage Users.

From here you can add new users to your team, change their role or set them to expire as well as remove them from your team. Users can be added as a Coach, Player or Recruiter. By categorizing users, they will be confined to only view specific film and Key Plays.



To add a player to your team, click on the Add User button, fill out the information and then click Update. They will then be added to your team and an automatic invite email will be sent to them explaining how they can log into your team and access film.

Players are unable to view any coach-only film or coach-only Key Plays. They are also unable to access the Exchange and Team Settings tabs as well as they are unable to change film properties or delete film. However, players are able to upload film. We did this so that the videographer can upload the game film without bothering the coach. We suggest that a coach get someone to video tape the game and upload it to the website. This will save the coach a considerable amount of post-game time.

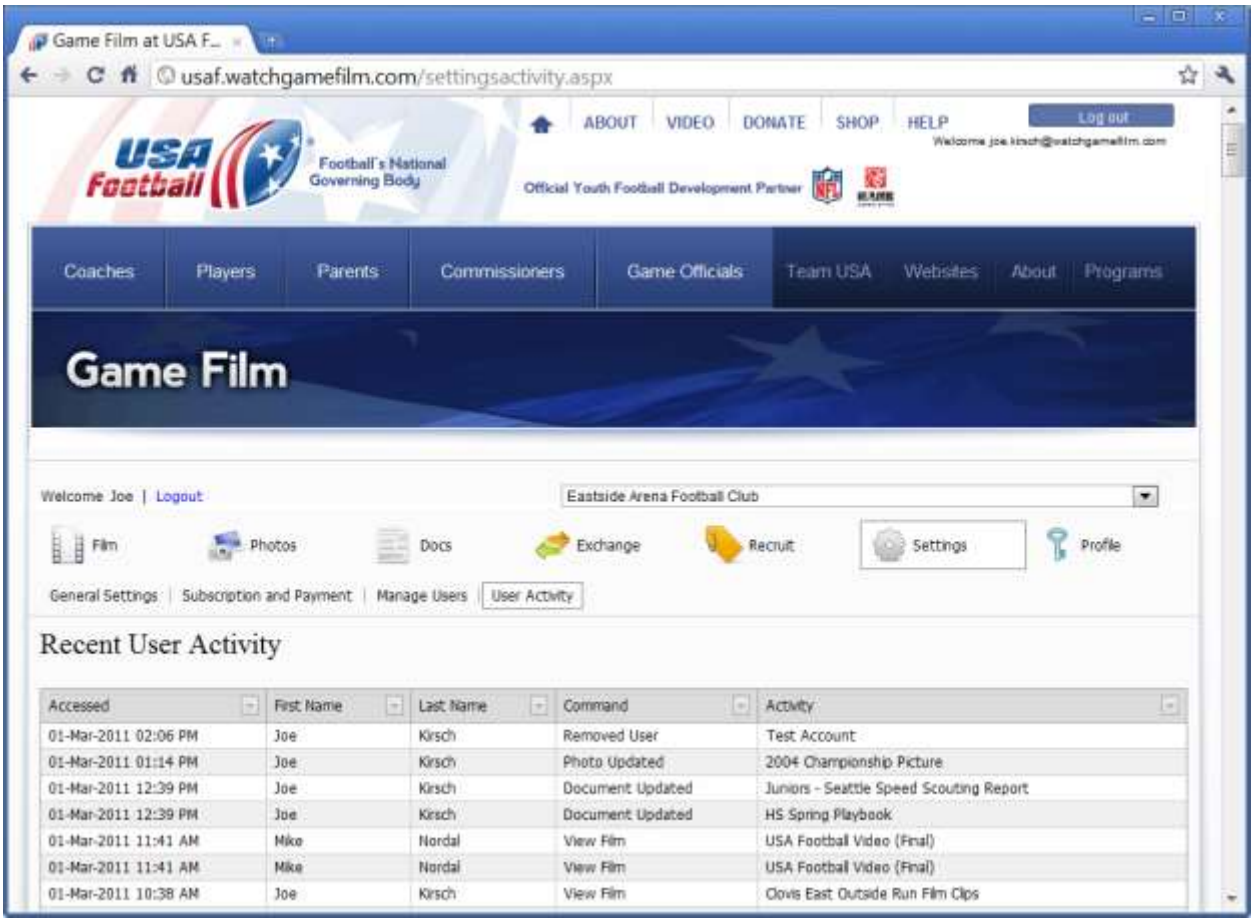
Coaches are able to do everything the owner is able to do, however, they are unable to remove the Owner from the team or change the owner's role.

Recruiters are only able to access the Recruiting tab and view film that is marked for Recruiters. They can also view any Key Play of a film that is marked for Recruiters.

Settings: User Activity

Most coaches want to know who from their team is looking at film. To monitor user activity, go to the Settings tab and click on User Activity.

You will see a complete list of all user activity in your account for the last 30 days.



You can filter on any column by simply selecting the drop down button to the right of the column name and then choosing the filter you want to apply. You can also sort this list by clicking on any the column header names.

Settings: Frequently Asked Questions

Q. How do I activate my account?

A. Go to the Settings tab and click on Subscriptions and Payment. Within that page you will find a "Click Here to Purchase Team or Renew Subscription" payment link. We use PayPal for our merchant services and we except most standard credit cards.

Q. How do I add users to my account?

A. Go to the Settings tab and click on Manage Users, then click on Add User. Enter the user information and define the team role of the user then click on Update. The user will be sent an automated welcome email with password and log in instructions.

Q. Do I need to enter an expired date when I add a user to my team?

A. No. You can always edit or delete users at any time.

Q. Why do I assign a user role?

A. The user role is important because coaches can decide to make film and key plays available for viewing by "coaches only" or "coaches and players." This allows you separate film and conversations from various groups within your team.

Q. What role do I assign for a parent or family member?

A. Parents and family members have the same role as players.

Q. My users say they haven't received an email with password after I added them. What happened?

A. Most likely, their junk mail or spam filter blocked the automated email from our system. We recommend that you alert your users to the fact that you're going to add them to the team system and have them adjust their mail settings to allow mail from any address with @watchgamefilm.com. Please also note that any user can have their password sent to them by going to the log in screen, entering their email address and clicking on Email Me My Password.

Q. Why can't I edit my users' information?

A. Because the user profile is unique to the user and not your team. Users may be part of more than one team, so we do not allow a coach to change a user's name after the user has been created. Coaches can add or remove users from a team as well as define their role within a team. If the user wants to change their name or email address, they must do it within the User Profile tab.

Q. How do I delete a user from my team?

A. Go to the Settings tab and click on Manage Users. Find the user and click on Remove next to the user in question.

Q. Can I monitor everyone's activity within my team?

A. Yes. To monitor user activity, go to the Settings tab and click on User Activity. You will see a complete list of all user activity in your account for the last 30 days.

Q. Can I see how much storage I have available or how many more users I can add?

A. Yes. This information is available under Settings, General Settings.

User Profile

The Profile section of our Game Film application allows users to update their basic contact information, reset their password as well as get an overview of all of the Game Film teams they are a part of.

The coach or owner of a team cannot change your User Profile information. They can only add or remove you from their team. Your profile is unique to you but it is global across all of the USA Football Game Film teams you are part of.

For example; let's say you belong to three teams and you log into one team and change your profile so that you receive film notifications via SMS. You will now receive SMS notifications on all three teams instead of just the one specific team you were logged into when you updated your profile.

User Profile Relationship between USA Football and WatchGameFilm.com

Users are linked between the USA Football and WatchGameFilm.com via their email address. Your email address must exist in both the USA Football and WatchGameFilm.com databases in order for you to successfully log into your team from the USA Football website.

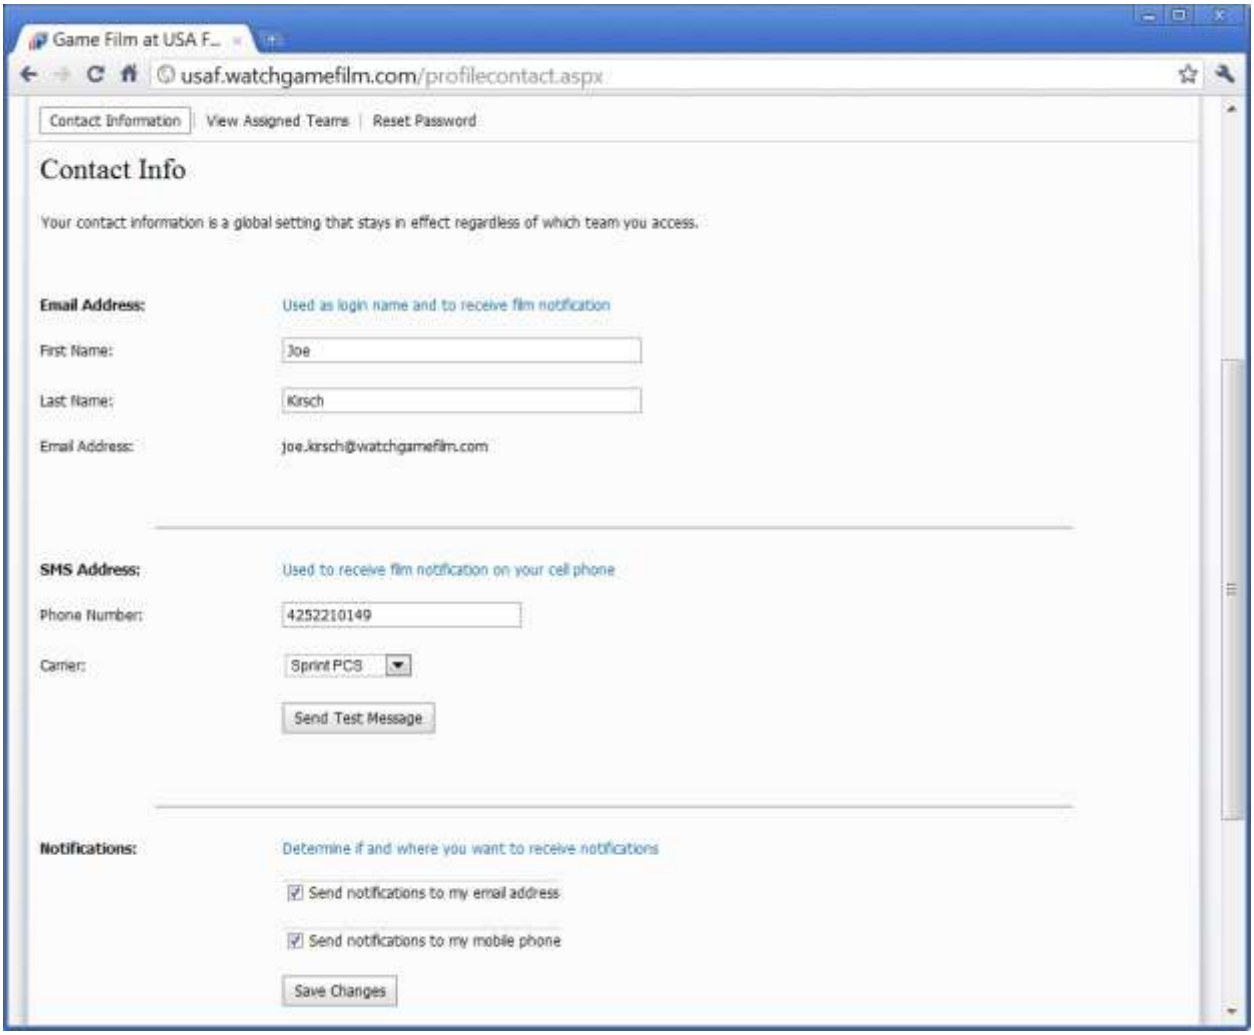
In the Profile section of the USA Football Game Film application you can specify how you want to be notified when film is available as well as how your name will appear to other users in the application.

However, to change your email address and/or your password, you must log directly into the USA Football website and make your changes under their Account Profile section. Changing your USA Football email address and/or password cannot be done within the USA Football Game Film application.

Profile: Contact Info

Users are able to change their contact information by going to Profile and clicking on Contact Information.

This web page allows users to change their Profile name as well as add a SMS Address so that film notifications can be sent to their phone.

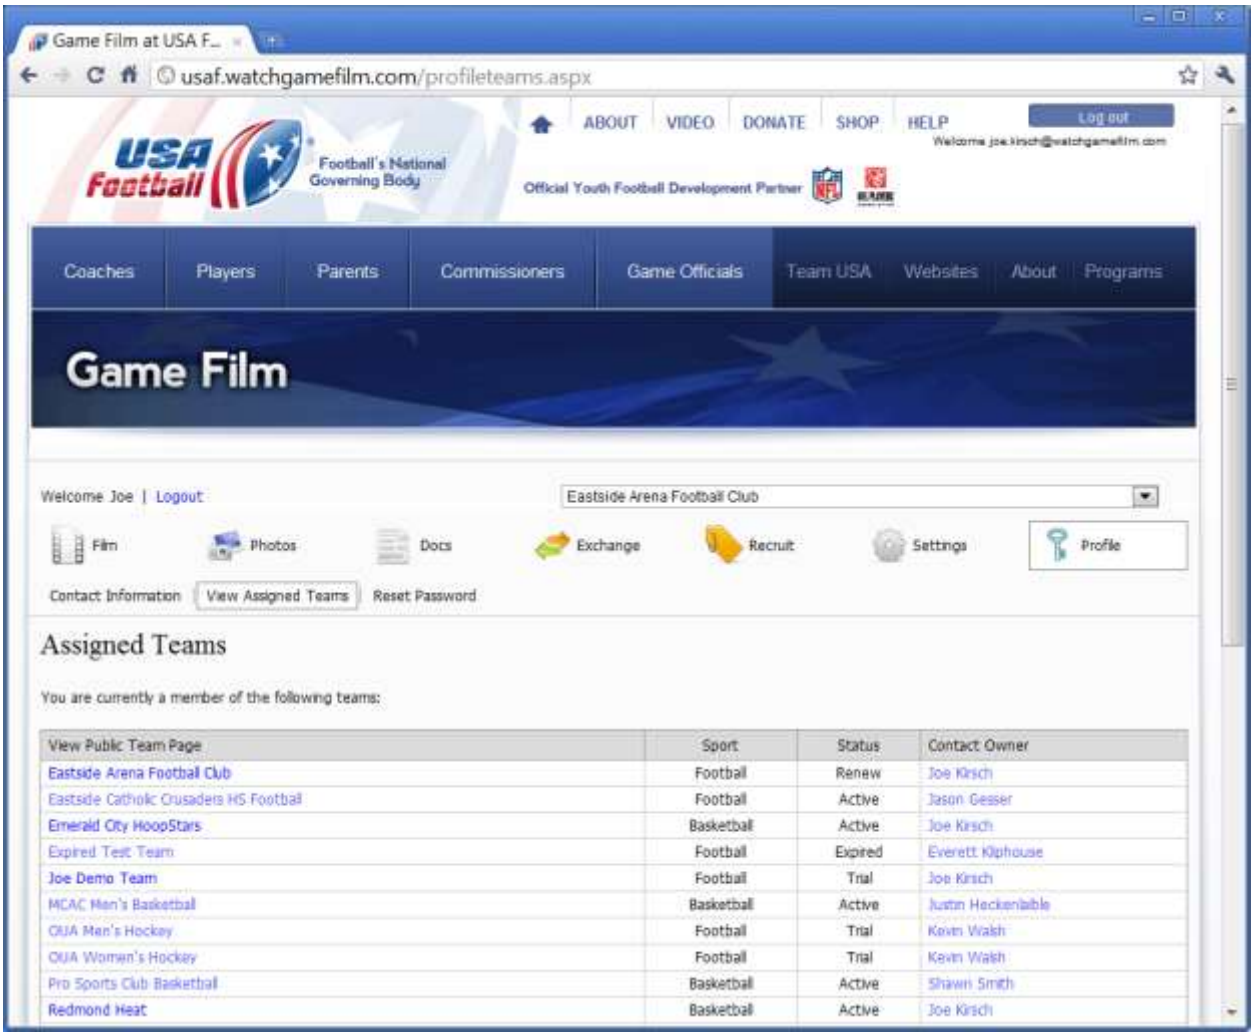


You can change the settings to tailor your needs and then click on Save Changes to update your profile.

Profile: Assigned Teams

Users are able to see what teams they are a part of by going to Profile and clicking on Assigned Teams.

A list of teams that you are a part of will be displayed. You can contact the owner of a particular team by clicking on their name or you can view public film for that team by clicking on the Public Team Page.



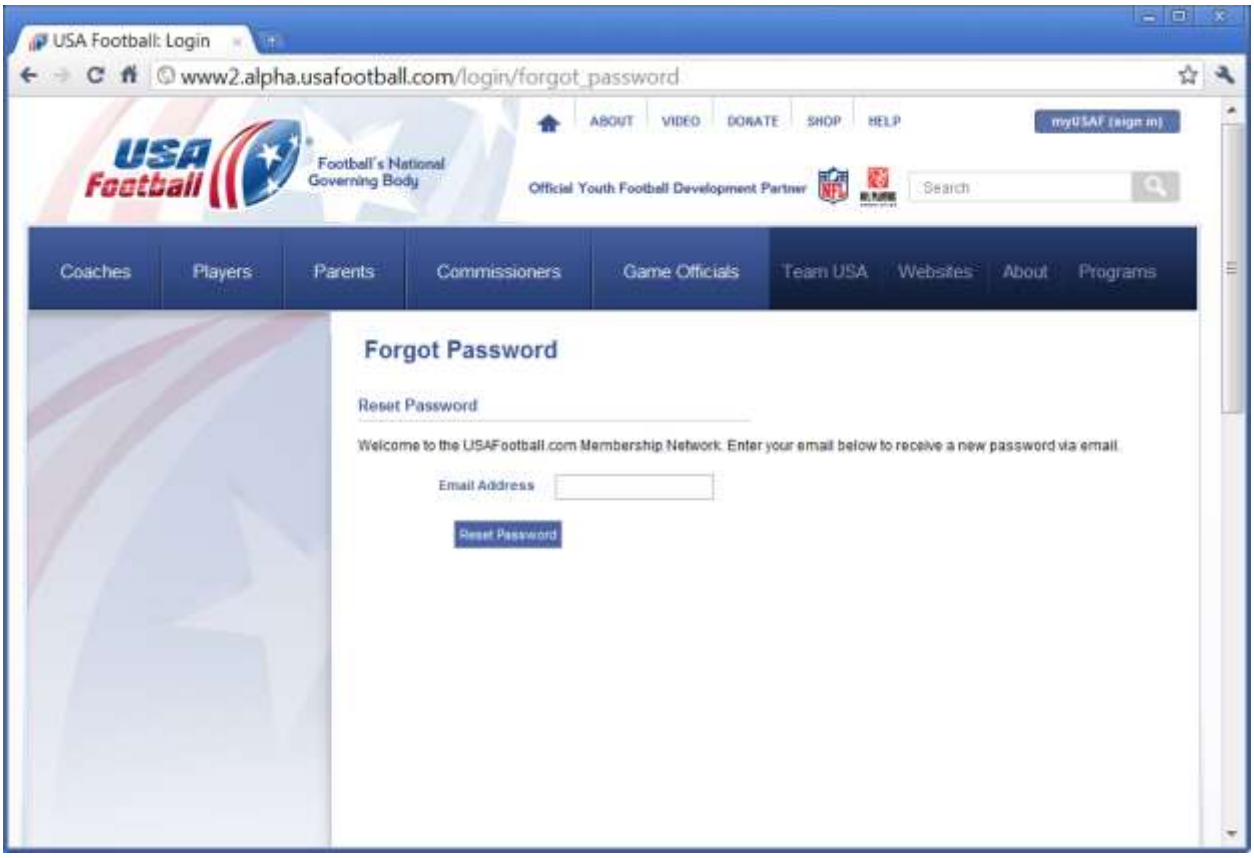
If a team has marked any of its film as Public; it is immediately available on WatchGameFilm.TV allowing anyone to view the film without logging into your team. WatchGameFilm.TV also allows users to create widgets and display game film directly on their own website.

Please visit www.WatchGameFilm.TV for more information.

Profile: Reset Password

Users are able to reset their password by going to Profile and clicking on Reset Password.

Another page will display allowing you to reset or change your password within the USA Football system. Enter in the email address that you use to log into USA Football. A password reset email will be sent to you allowing you to change your password.



Profile: Frequently Asked Questions

Q. How do I change my Password?

A. Log into the USA Football Game Film application, go to Profile and click on Reset Password A. You can also visit http://www2.alpha.usafootball.com/login/forgot_password

Q. How do I change my Email Address?

A. This cannot be done from the USA Football Game Film application. You must go to http://www2.alpha.usafootball.com/account in order to change your email address. Note that you will also need to contact our support team at usafootball@watchgamefilm.com so that we can update your Game Film profile with your new email address as well.

Q. How do I get Film Notifications on my Mobile Phone?

A. Log into the USA Football Game Film application, go to Profile and click on Contact Info. From there you can enter in your Mobile Phone number and select your carrier. You can also click on the Test SMS button to make sure you are successfully receiving notifications on your mobile phone. If you do not see your phone carrier listed or you need assistance, contact our team at usafootball@watchgamefilm.com.

Q. How do I Stop receiving Film Notifications?

A. Log into the USA Football Game Film application, go to Profile and click on Contact Info. From there, uncheck the Email Notification and SMS Notification boxes and hit Save.

Q. Can a Coach change my Profile Information?

A. No. Coaches can only add or remove you from their own team. They cannot change how you are to be contacted or how your name should appear. Note that the coach who initially creates your Profile and adds you to your first Game Film team will specify your first and last name as well as your email address. However; once your initial profile has been created, the coach can no longer modify your information.

Q. Is the Profile on WatchGameFilm.com the same as my USA Football Profile?

A. No. We do use your email address to authenticate against the USA Football website. But the changes that you make to your profile on either site; do not synchronize between the two. WatchGameFilm.com only manages your SMS contact information that you provided as well as how you want to be notified with film updates. The USA Football website manages your complete USA Football account profile.
